

Overview

This doc is meant to provide context and requirements definition for the Glowbar booking flow that will be used instead of the existing Heady SDK booking flow. Let's build out our ideal state and then scope out a phased approach for anything we don't want to work on in the initial phase.

Assumptions

- We'll use the Heady booksmart platform as the starting point

Baseline features List

It's assumed that the new booksmart app can do all of what the current SDK powered app can. Plus, we need to layer in the list of scope items that were being discussed with Heady. These include:

Setup & Customizations

<u>Work</u>	<u>Timing</u>	<u>Cost</u>
Initial Setup with Theming	1 Week	\$25,000
Total		\$25,000

<u>Work</u>	<u>Timing</u>	<u>Cost</u>
Nearby Times	1-2 Weeks	\$9,500
Join Waitlist	1 Week	\$6,400
Member vs. Non-Member	3 Days	\$3,800
First-Time vs. Returning User	3 Days	\$3,800
Klaviyo Integration	3 Days	\$3,800
GTM Event update. Match payload	2 Days	\$2,500
Total		\$29,800

Total Timeline 8-9 Weeks

\$54,800

Nearby times

Nearby times should work by showing the two closest studios to the studio the user is currently looking at and show a number of available times to book.

- ☐ Question? Do we want to always show nearby times, or only if inventory is low at the studio the users is browsing?

Join Waitlist

The join waitlist is the ability to join a waitlist for morning, afternoon or evening per BLVD waitlist function.

Things to figure out include:

- ☐ What actually happens when we include someone in the waitlist? Do they get emailed when a slot opens up? How do we make sure not too many people on the waitlist get an email if a slot opens up?

Member states

- Member VS Nonmember and First time VS Repeat/Returning user are all states we need to support.
- This is showing you service types specifically based on if you're a member or not, using the member tag. So if you are tagged as a member, you only see the service we use for members. If you aren't, you see non member service and pushes to become a member.
[Video Adam recorded is here.](#)

Questions:

- ☐ Does the booksmart flow have all of this functionality or not? I.e can booksmart already sell memberships online?

Klaviyo Integration

- ☐ What do we actually need to do? Just hook Booksmart up to capturing data in Klaviyo, or anything special?

Ideal state feature ideas

UX / Layout

I think we all like the Peachy layout the best. Also, we seem to prefer the non widget/popout version of the UX.

Off peak booking discounts

Below is Silver Mirror's version of head start hours that appears when you're booking in their booking flow. Glowbar team loves it. We already know which studios we'd want to trigger under utilization on and down to the hour level we can set time slots that we designate as 'off peak' (probably one setting overall for now across the board, but eventually by studio if we want that too).

08:00 PM				

Another option is from Alan and Studs:

Here's Alan's note:

"We wanted to do this earlier in the year but had limitations with Heady. Here was the original inspo that we had from my past life at Studs. For Booksmart and the new version we are looking to have for 2026- here is another inspo that could help visual an option. If layering it with Heady, it wasn't flexible but static and we would need the back end to be flexible to change locations, days of week and times. (Cc @Adam Farber)"

studs.com

Notes from call 11/14

- Check for booking widget SEO considerations
- Make sure we're not changing any IP addresses that could impact Klaviyo
- Full page vs pop out
- Can we A/B test the UX out of the gates? And/or if someone shows high intent like a google search as a source, we bring them right into the booking flow instead of ask for email/contact info earlier on.
- Are we using Booksmart or not? Need to revisit the limitations.
- End of next week have the ability to show end to end in a presentation
 - Then move to prototype
 - Then code it
- Gift card - question on buying more easily
- Have to look at map API call charges

11/20 call notes

Video recording is here: [🔴 kzf-uoqy-bsf \(2025-11-20 09_36 GMT-5\).mp4](#)

- Do you have screenshots how does the logged in member flow currently looks like? What about logged in non-member?
 - Yes - see video
- What happens when somebody tries to sign up for FTT with an email or phone number that's already in a system? (they have an account)
 - Have either gone through the flow and made an account with no appt
 - Or have had an appt and in the system
 - You'd see the logged in non member with no history
 - Non member ftt
 - Non member 17 and under - 17 and under have to have a waiver and some stuff won't perform
- If somebody goes in for a treatment (from the street), do the staff create an account after the treatment?
 - Front desk creates an account in Blvd - create new client, put in fname, name, phone, email, book appt, time on cal, confirm and complete booking
 - At this point I have an account
 - Would show non member FTT because it's not completed yet
 - Once you have a visit of 1 or more you'll see non member returning
- What's the process after somebody books a treatment? Do they get confirmation emails from BLVD? How do you handle cancellations or rebooking / appointment changes. Do they need to log in to their account?
 - Yes - you get confirmation email - BLVD email

Subject: [Action Needed] Your upcoming appointment with Glowbar on Dec 6, 2025

To: adam@glowbar.com

The logo consists of the word "GLOWBAR" in a white, serif, all-caps font, centered within a solid black square.

Your appointment has been booked

Hi Adam Farber,

You are scheduled for an appointment at Glowbar Tribeca on Dec 6, 2025 at 8:40am EST.

You have outstanding forms that should be completed prior to your appointment.

[Complete Forms](#)

Appointment Details

Adam Farber

Date : Dec 6, 2025

Time : 8:40am EST

Duration : 30 minutes

Location : 147 Duane Street, New York, NY 10013

Important Instructions:

Adam Farber

Date : Dec 6, 2025

Time : 8:40am EST

Duration : 30 minutes

Location : 147 Duane Street, New York, NY 10013

Important Instructions:

Please fill out your intake forms prior to arriving. Additionally, please arrive 10 minutes before your scheduled appointment time.

Running more than 5 minutes late to your appointment will lead to a reschedule; please call our studio at (929) 446-4300 to notify us. Any cancellations or reschedules that occur less than 24 hours beforehand are subject to a \$30 fee.

If you arrive more than 10 minutes late, your appointment will be canceled and you will be charged a fee of \$30.

Reminders before your facial:

- Prescription Retinol (Tretinoin, Retin-A, etc): Stop using prescription retinol 3-5 days before your facial
- Beards and Facial Hair: Avoid shaving the morning of your facial. You can shave the night before if needed, or simply skip shaving altogether
- Botox, Filler, and Lasers: Wait at least two weeks before your facial
- Facial Waxing and Threading: Wait 2-3 days before your facial
- Accutane (or similar medication): Please wait 6 months after completing your medication cycle

When in doubt, give the studio a call so we can assist you!

8:40am EST (Member) First Time & Returning Treatment
with **Heather K.**

If you cannot make this appointment, [please let us know immediately](#) to avoid the cancellation fees described in our [cancellation policy](#).

- Cancel fee is \$30
 - To cancel if in window can cancel or reschedule it if >24 hours

- If less than 24 hours front desk has ability to charge the \$30 fee or not
 - Create a cancel or no show in BLVD
 - Process that
 - Cancel appt in blvd, say why it's cancelled and conf gets sent to the client

GLOWBAR

Appointment cancellation

Hi Adam Farber,

Your appointment at Glowbar Tribeca on Dec 6, 2025 at 8:40am EST has been cancelled.

If you'd like to book another appointment you can click below:

Thank you,
Glowbar

Appointment Details

Adam Farber

Date : Dec 6, 2025

Time : 8:40am EST

Duration : 30 minutes

Location : 147 Duane Street, New York, NY 10013 (929) 446-4300

- What happens when somebody buys a package (5 treatments for example). After they pay, they can book anytime within their account? Can they book using the widget?
 - If someone has pkg, they book appt
 - Card won't be charged today

- Book appt
- Front desk when checking you out they show on left side of checkout to redeem from voucher from package
- In the blvd portal the user will see vouchers - don't see it into the main UX
-
- After somebody purchases the membership can they book through the widget or using their account?
 - Everyone books through the widget. You can't go to the BLVD website and book an appt - you'd get pushed back to the booking.
- What happens when a credit card expires for a member? I know you charge everyone in the beginning of the month, do they get some time to add a new card? And they can not book, till their bill is paid, right?
 - If card expires, they go into the past due category and blvd notifies the person, attempts to make the charge a few times, then will continue to fail. Member can still book appt but when come in it'll say when someone is checking out - front desk will see card expired

Flows

IF logged in as member:

Login → Auth → Book a treatment, only see book first time and returning treatment or redeem with voucher → select → booking flow

If membership is past due - will pull in the status state

IF logged in as non-member:

Login → Auth → Welcome Adam (don't show membership) → book a treatment → non member returning

→ Purchase a membership deal is replaced with Black Friday (BF) sale right now

- Sign up for 1x or 2x
- Members and non member can purchase a packages
- Members and non members can purchase a gift card

Wishlist Items - these can be put into maintenance backlog if we can't do for v1

- Purchase the 2x membership or upgrade from single to 2x per month
- Show number of vouchers a user has in main UX (if member or non-member who bought a package) (Adam mentioned this in the video)
